PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate and Full Stack Developer with hands-on experience building secure, scalable web applications using the MERN stack and PostgreSQL/MySQL. Delivered authentication systems (JWT, OAuth 2.0, Email OTP, bcrypt), RESTful APIs, and responsive UIs across two internships, completing 6+ full-stack and frontend projects. Strong fundamentals in data structures, algorithms, and software engineering best practices, with a consistent record of writing clean, secure, and maintainable code. Seeking Full Stack Developer, Software Developer, or Backend Developer roles to deliver measurable business impact.

TECHNICAL SKILLS

Languages: JavaScript, Java (Learning), SQL

Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design, React.js (Basic — used in internship projects)

Backend: Node.js, Express.js, REST API Design & Development

Databases: PostgreSQL, MySQL, MongoDB, Sequelize ORM

Security: JWT, OAuth 2.0, bcrypt, Email OTP Verification, Session Management

Tools & Platforms: Git, GitHub, VS Code, Postman

INTERNSHIP EXPERIENCE

Full Stack Development Intern — Athenura

Mar 2026 – Present

- Engineered a secure authentication system using JWT and OAuth 2.0, reducing unauthorized access risk and strengthening application-wide security posture
- Implemented Email OTP verification and bcrypt password hashing, safeguarding credentials for 100% of registered users
- Built and optimized session management workflows, improving login persistence and reducing repeat authentication friction
- Delivered full-stack features end-to-end in collaboration with senior developers within an Agile development environment

Full Stack Development Intern — SkillEcted

Jun 2025 – Feb 2026

- Developed 10+ responsive, cross-browser web pages using HTML5, CSS3, and JavaScript, improving usability across devices
- Designed and executed CRUD operations on MySQL databases, ensuring efficient data storage, retrieval, and integrity
- Collaborated with a 5-member development team using Git/GitHub for version control and code reviews, reducing merge conflicts through systematic branching
- Performed systematic testing and debugging, improving overall code quality and reducing production defects

PROJECTS

Student Management System | Full Stack Web Application

- Built a role-based access control system supporting 3 user roles (admin, faculty, student) using Node.js, Express.js, and PostgreSQL
- Designed normalized database schemas with Sequelize ORM and exposed secure RESTful APIs for CRUD operations

Professional Portfolio Website | Personal Project

- Designed and developed a fully responsive personal portfolio with SEO optimization, improving search visibility and recruiter discoverability

E-Commerce Clones & API Integration Projects (Amazon, Myntra, To-Do App) | Personal Projects

- Replicated core e-commerce features (product listings, cart, responsive UI) using React.js and modern CSS frameworks across 2 platform clones
- Built a full-featured To-Do application and integrated multiple third-party REST APIs for real-time data handling

EDUCATION

B.Sc. Computer Science

Savitribai Phule Pune University

CERTIFICATIONS

- Full Stack Web Development Internship Certification
- Citi Technology – Software Development Job Simulation (Forage)

ACHIEVEMENTS

- Successfully delivered 6+ full-stack and frontend projects spanning authentication systems, e-commerce platforms, and productivity tools
- Implemented industry-standard security practices (JWT, OAuth 2.0, bcrypt, OTP) across internship projects; maintained an active GitHub portfolio with consistent contributions
